

About EC&M

Photographs above are of the EC&M corporate offices.

EC&M was formed in 1996, originally as a commercial, electrical contractor. Our President and Founder, Michael L. Wynne, had the vision to see the synergies between the electrical business and the security business, and in 2001, EC&M entered the commercial security business by creating EC&M Integrated Solutions. EC&M hired a team of seasoned

professionals to provide design, installation, and service to our clients in Virginia and North Carolina. In 2011, the original two divisions of EC&M, Electrical Contracting and Integrated Solutions, have been “rebranded” under the name “EC&M Integrated Solutions”.

Today, EC&M’s electrical division is still the firm of choice for :

- Distribution
- Retail (including Auto Dealerships)
- Manufacturing
- Healthcare
- Education (Public K-12, Private, Higher Education)

Our security division has grown into one of the industry leaders in security, providing our clients with integrated design, installation and service of access control systems, video (optical, digital, and thermal) and intrusion detection. EC&M Integrated Solutions serves the following:

- Higher Education (Public and Private)
- Public Education
- Healthcare
- Historic Facilities
- Financial Facilities
- National Industrial Security Systems (UL 2050 Certified)
